四、寫作 (20%) Smart Phone Use in Taiwan

It has been reported that the number of people using smartphones in Taiwan now exceeds 10 million, nearly half the population. Write an essay of 150-180 words on this topic. In your essay, discuss the use of smartphones in Taiwan and give reasons to explain their growing popularity. (adapted from <http://www.Ittc.ntu.edu.tw/teacher/HL/ws.htm>)

Smartphones have become very popular in Taiwan. At first, smartphones were used by business people primarily. As the smartphone mania overwhelmed Taiwan, not only adults, but also students and children began to use them. As a result, accessories, for instance, small bags to hold things to protect people against radiation, sold like hot cakes.

Many reasons account for the rapidly increasing popularity of smartphones in Taiwan. First people in Taiwan have higher living standards than before and are more willing to try "new stuff". Second, the various functions of smartphones draw people's attention. People in business use smartphones to keep track of the stock market; parents buy smartphones for their children so that they know where their kids are. Third, the more flexible government regulations make it easier for people to own smartphones.

For all these reasons, the smartphone seems to be a necessity of daily life nowadays in Taiwan.
